```java
package Exercise;

public class Exercise51 {
    public static void main(String[] args) {
        int number = 12321;
        int tmp = number;

        int result = 0;
        while(tmp != 0) {
            result = result *10 + tmp%10;
            tmp /= 10;
        }
        if(number == result) {
            System.out.println(number + "회문수입니다.");
        } else {
            System.out.println(number + "회문수가 아닙니다.");
        }
    }
}
```
