```java
package Exercise6;

public class Bank {
    private Customer[] customers;
    private int numberOfCustomer;

    public Bank() {
        customers = new Customer[10];
    }

    public void addCustomer(Customer customer) {
        customers[numberOfCustomer++] = customer;
    }

    public Customer[] getCustomers() {
        return customers;
    }

    public int getNumberOfCustomers() {
        return numberOfCustomer;
    }

    public Customer getCustomer(int index) {
        return customers[index];
    }
}
```
